Sorry to be late in getting this to you –

CA UIC Program: In accordance with California's Class II UIC compliance plan, by May 15th we expect the State to provide updated information on their water supply well screening for all disposal wells injecting into non-exempt aquifers and additional details about the number of cyclic steam injection wells needing exemptions. We are meeting with the State on May 13th to discuss the status of these deliverables and their progress toward other significant compliance plan milestones ahead. (Albright, 2-3971)
